Erik Siegel - erik@xatapult.com

xtpxlib-xdoc is part of the **xtpxlib** library. **xtpxlib** contains software for processing XML, using languages like XSLT and XProc. It consists of several separate components, all named xtpxlib-*. Everything can be found on GitHub (https://github.com/xatapult).

xtpxlib-xdoc TBD

Installation and usage information can be found on **xtpxlib**'s main website http://www.xatapult.nl.

Technical information:

License: GNU GENERAL PUBLIC LICENSE - Version 3, 29 June 2007

Git URI: git@github.com:xatapult/xtpxlib-xdoc.git

Git site: https://github.com/xatapult/xtpxlib-xdoc

This component depends on:

- xtpxlib-common (Common component)

TEST

Module	Description
[*** Referenced linkend id "compare.mod.xsl" not found (phase: inline)]	XSL library module with support for comparing XML documents/elements.
[*** Referenced linkend id "date-time.mod.xsl" not found (phase: inline)]	XSLT library module containing functions for working with dates and times.
[*** Referenced linkend id "format-output.mod.xsl" not found (phase: inline)]	XSLT library with functions for formatting output/strings.
[*** Referenced linkend id "general.mod.xsl" not found (phase: inline)]	XSLT library module with general constants and code.
[*** Referenced linkend id "href.mod.xsl" not found (phase: inline)]	XSLT library module with functions for the generic handling of href-s. (filenames/paths).
[*** Referenced linkend id "message.mod.xsl" not found (phase: inline)]	Message related templates.
[*** Referenced linkend id "mimetypes.mod.xsl" not found (phase: inline)]	MIME type conversion related functions.

Module	Description
[* Referenced linkend id "parameters.mod.xsl" not found (phase: inline)]**	Takes an XML document with parameters and turns this into a parameter map. More information in the README.md file.
[* Referenced linkend id "uuid.mod.xsl" not found (phase: inline)]**	UUID related functions.
